

Chris Fry

Google

Chris Fry is Director of Resource Efficiency Data Science at Google, where he is responsible for improving the efficiency, obtainability, and profitability of Google's compute and storage resources through the application of data science and analytics. Chris has worked in the field of forecasting for over 25 years, and has developed forecasts and built forecasting systems for companies across a wide range of industries including energy, pharmaceuticals, airlines, automotive, apparel, grocery retail, advertising, and computer systems. Chris served as an advisor on the M5 forecasting competition, contributing to the design of the competition, and helping to bring the competition onto Kaggle. He has a B.S. degree in Operations Research and Industrial Engineering from Cornell University, and an M.S. degree in Management Science and Engineering from Stanford.
