Shiyu Wang

ByteDance Inc.

Shiyu Wang is a Senior Staff Researcher at ByteDance Inc., and serves as the Director of the Supply Chain Algorithm Team. Previously, he was a Staff Researcher at Ant Group. His current research primarily focuses on time series analysis tasks based on deep learning and the development of multimodal large models for time series. He is dedicated to creating powerful learning machines from big data to solve real-world application problems. He leads the development of a time series forecasting platform and the innovative research and development of time series algorithms, enhancing the integration of forecasting and decision-making capabilities. He primarily publishes in top conferences such as NeurIPS, ICLR, IJCAI, KDD, AAAI, WSDM, ICDM, and DASFAA, where he also serves as a reviewer and program committee member.
