Yijie Peng

Peking University

Dr. Yijie Peng is currently an associate professor of the Department of Management Science and Information Systems in Guanghua School of Management and is also affiliated with Institute of Artificial Intelligence, both at Peking University (PKU). He received his Ph.D. from the Department of Management Science at Fudan University and his B.S. degree from the School of Mathematics at Wuhan University. Many of his publications appear in high-quality journals including Operations Research, INFORMS Journal on Computing, and IEEE Transactions on Automatic Control, and AI conferences. He was awarded the Outstanding Simulation Publication Award of INFORMS Simulation Society and the Outstanding Research Award of Ministry of Education of China. He serves as a department editor for Journal of System Science and System Engineering, and an associate editor for Asia-Pacific Journal of Operational Research. His research interests include stochastic modeling and analysis, simulation optimization, machine learning, and healthcare.
